In the Claims

1-6. (Cancelled)

7. (Currently amended) A computerized method of execution on a transaction device, the method comprising:

receiving a user request specifying a desired electronic output function that is unavailable on the transaction device;

locating a kiosk that provides the desired electronic output function to the user while the transaction device is coupled to the kiosk; and

providing direction to the located kiosk.

8. (Previously presented) The method of claim 7, further comprising:

establishing a secure link between the transaction device and the kiosk.

9-13. (Cancelled)

14. (Currently amended) A system comprising:

a transaction device to receive a user request specifying a desired electronic output function that is unavailable on the transaction device; and

a kiosk that provides, while the transaction device is coupled to the kiosk, the desired electronic output function;

wherein the transaction device locates the kiosk and provides direction to the located kiosk.

15. (Previously presented) The system of claim 14, wherein the transaction device establishes a secure link to the kiosk.

16. (Previously presented) The system of claim 14, wherein the transaction device accesses input and output devices of the kiosk.

17-22. Cancelled

23. (Currently amended) The machine-readable medium that provides instructions, which if executed by a processor of a transaction device, cause the processor to perform operations comprising:

receiving a user request specifying a desired electronic <u>output</u> function that is unavailable on the transaction device;

locating a kiosk that provides the desired electronic <u>output</u> function to the user while the transaction device is coupled to the kiosk; and

providing direction to the located kiosk.

24. (Previously presented) The machine-readable medium of claim 23, further providing instructions, which if executed by the processor, cause the processor to perform operations comprising:

establishing a secure link between the transaction device and the kiosk.

25-28. (Cancelled)

29. (New) The method of claim 7, wherein the output function is associated with a video game.

30. (New) The method of claim 7, wherein the output function is associated with a facsimile communication.

31. (New) The system of claim 14, wherein the output function is associated with a video game.

32. (New) The system of claim 14, wherein the output function is associated with a facsimile communication.
